Subject: Submission to the NSW Net Zero Commission 2025 Consultation
Date: Friday, 11 July 2025 2:53:44 PM

Dear Commissioners,

As a NSW resident, I am grateful for the opportunity to engage in the 2025 Net Zero Commission consultation. Please accept this email as my written submission to this consultation process

I would like to ask you, the Net Zero Commission, to make the following recommendations to key NSW Ministers, to be actioned within this current term of government:

1. We are destroying our culture, our agriculture, mining, manufacturing, and our children when, with the education system tells our children what to think instead of how to think and we are selling our country to the highest bidder while destroying our people and environment.

We are making it easy to get Australia to become a communist country by sacrificing our people, environment and government renewable pagan gods of renewables. And it's been documented by 4 corners ABC that we now have unexplained cancers in our young people.

Solar panels have been around for over 30 years, WHAT A CO-INCIDENCE. this industry should be stopped much like the live cattle export was stopped, OUR PEOPLE ARE DIEING, it's not the cattle this time.

Yours Sincerely,

Annette Wheaton, NSW resident
